r		
Ans:	Instructing, guiding, supervising and influencing people enabling them to achieve organizational objectives are called directing. In the process of directing, employees are coached to develop communication and are encouraged to accomplish their goals.	02
	Directing is a key element in the process of management. After formulating the plans for accomplishing the pre-determined goals, the organizational structure is prepared and suitable persons are designated to appropriate roles, and the organization commences its operations. However, necessary actions will only initiate after a command in chief provides direction to the higher-level management.	
	Directing encourage subordinates to work effectively and efficiently.	
	Characteristics of Direction:	
	<ul> <li>It is a Dynamic Function: It is the continuous process here manager has to direct, guide, motivate their subordinates to achieve the goal. With change in plan corresponding methods can be adapted.</li> <li>It Initiates Action: Management has to do initiation of any action in achieving goals. All works will start with some directions.</li> <li>It is a Universal Function: It is applicable to all types of organization</li> </ul>	
	at all functional units.	
	<ul> <li>It provides necessary link between various Managerial Functions: Directing requires for all types of managerial function such as planning, staffing, organizing and controlling. They can be inter- dependent on each other and proper directing can be useful in integrating them.</li> <li>It is Concerned with Human Relationships: The directing create harmony and coordination among people working in organization. E.g. organizing an event or meeting monthly and daily target they will be working in an integrated manner.</li> </ul>	
	• Harmony of objectives: It helps in coordinating employee objective	00
	with the organization objective.	08
	• Unity of direction or command: A proper directing need unity in direction or command. Instructions given to the subordinates should be unambiguous.	
	• <b>Direct supervision:</b> Manager should have direct relationship with their subordinates. It helps them to mutually understand the requirements and achieve their goals.	
	• <b>Effective communication:</b> To do the direction effective communication is needed. It may be in the form of email, call, public addressing or meeting.	
	• Follow through: Direction is a continuous process which needs proper tracking of assigned tasks and target completion. A proper follow through helps in meeting goals soon.	
	- At least <i>Eight</i> characteristics are desired	

3.	Describe autocratic and democratic leadership styles? List their merits and demerits.	10
ns:	<ul> <li>i) Autocratic leadership</li> <li>An autocratic leader is one who dominates and drives his subordinates through coercion, command and the instilling of fear in his followers.</li> <li>An autocratic leader alone determines policies, plans and makes decisions.</li> <li>He demands strict obedience. Such leaders love power and love to use it for promoting their own ends.</li> <li>They never like to delegate their power for they fear that they may lose their authority.</li> </ul>	02
	<ul> <li>Merits : <ul> <li>It can increase efficiency</li> <li>Save time</li> <li>Get quick results under emergency conditions</li> <li>Chain of command and division of work are clear.</li> </ul> </li> <li>Demerits: <ul> <li>People are treated machine-like cogs without human dignity</li> <li>One way communication without feedback</li> <li>The leader receives little or no input from his sub- ordinates for his decision-making which is dangerous in the current dynamic environment.</li> <li>Students can elaborate these merits and demerits with own examples</li> </ul> </li> </ul>	03
	ii) Democratic leadership : Also known as participative leadership. In this style, the entire group is involved in goal setting and achieving it. A democratic leader follows the majority opinion as expressed by his group. Subordinates have considerable freedom of action. The leader shows greater concern for his people's interest, is friendly and helpful to them. He is always ready to defend their subordinates individually and collectively.	02
	<ul> <li>Merits: <ul> <li>leadership encourages people to develop and grow</li> <li>receives information and ideas from his subordinates to make decisions</li> <li>boosts the morale of employees.</li> </ul> </li> <li>Demerits: <ul> <li>Some leaders may use this style as a way of avoiding responsibility</li> <li>Can take enormous amount of time for making decisions.</li> </ul> </li> <li>Students can elaborate these merits and demerits with own examples</li> </ul>	03

4.	What is motivation? Explain Maslow's need hierarchy theory of motivation	10
Ans:	<b>Motivation</b> is inspiring the subordinates to contribute with zeal and enthusiasm towards organizational goals.	
	Performance of an employee can be measure as-	
	Performance = Ability × willingness	
	One of the most important functions of management is to create <b>willingness</b> amongst the employees to perform in the best of their abilities. Motivation is enhancing the <b>willingness</b> to work which improves the performance. Motivation is the word derived from the word 'motive' which means needs, desires, wants or drives within the individuals. It is the process of stimulating people to actions to accomplish the goals. In the work goal context the psychological factors stimulating the people's behavior can be -	
	<ul> <li>desire for money</li> <li>success</li> <li>recognition</li> </ul>	03
	job-satisfaction	
	<ul> <li>team work, etc</li> <li>Therefore the role of a leader is to arouse interest in performance of employees in their jobs. The process of motivation consists of three stages:-</li> <li>A felt need or drive</li> </ul>	
	<ul> <li>A stimulus in which needs have to be aroused</li> <li>When needs are satisfied, the satisfaction or accomplishment of goals.</li> </ul>	
	Therefore, we can say that motivation is a psychological phenomenon which means needs and wants of the individuals have to be tackled by framing an incentive plan.	
	Maslow's Need Hierarchy Theory Abraham Maslow is well renowned for proposing the Hierarchy of Needs Theory in 1943. This theory is a classical depiction of human motivation. This theory is based on the assumption that there is a hierarchy of five needs within each individual. The urgency of these needs varies. These five needs are as follows-	
	Self- Actualization Esteem Needs	01
	Social Needs Safety Needs Physiological Needs	01

r		
	FIGURE: Maslow's Need Hierarchy Model	
	<ol> <li>Physiological needs:         <ul> <li>The basic needs for sustaining human life itself, such as food, water, shelter and sleep.</li> <li>Until these needs are satisfied to the reasonable degree necessary to maintain life, other needs will not motivate people.</li> </ul> </li> </ol>	
	<ol> <li>Security or safety needs:         <ul> <li>Safety needs include physical, environmental and emotional safety and protection.</li> <li>People want to be free of physical danger and of the fear of losing job, property or shelter.</li> </ul> </li> </ol>	
	<ol> <li>Social needs:         <ul> <li>Since people are social being, they need to belong, to be accepted by others.</li> <li>Social needs include the need for love, affection, care, belongingness, and friendship.</li> </ul> </li> </ol>	06
	<ul> <li>4. Esteem needs:</li> <li> <ul> <li>Once people begin to satisfy their need to belonging, they tend to want to be held in esteem both by themselves and by others.</li> <li> <ul> <li>This kind of need produces such satisfaction as power, prestige and status.</li> <li>Esteem needs are of two types: internal esteem needs (self- respect, confidence, competence, achievement and freedom) and external esteem needs (recognition, power, status, attention and admiration).</li> </ul> </li> </ul></li></ul>	
	<ul> <li>5. Self-actualization needs: <ul> <li>It is desire to become what one is capable of becoming to maximize one's potential and to accomplish something.</li> <li>It includes the need for growth and self-contentment. It also includes desire for gaining more knowledge, social- service, creativity and being aesthetic. The self- actualization needs are never fully satiable. As an individual grows psychologically, opportunities keep cropping up to continue growing.</li> <li>Students can write in own way similar to this with examples.</li> </ul> </li> </ul>	
5.	Explain Henry Fayol's administrative management.	10
Ans:	Administrative management focus organization rather than individual. Delineated the management functions of planning, organizing, commanding, coordinating, and controlling.	
	The Administrative Theory was proposed by Henry Fayol, who studied the organizational problems from the manager's viewpoint and found organization's activities can be classified as Technical, Financial, Commercial, Security, Accounting and managerial.	
	Henry Fayol's 14 Principles of Management:	
	1. Division of Work: The work should be divided among the individuals	

<u>г</u>	
	on the basis of their specializations, so as to ensure their full focus on
	the effective completion of the task assigned to them.
	2. Authority and Responsibility: The authority and responsibility are
	related to each other. Authority means the right to give orders while the
	responsibility means being accountable. Thus, to whomsoever the
	authority is given to exact obedience must be held accountable for
	anything that goes wrong.
	3. <b>Discipline:</b> The individuals working in the organization must be well-
	disciplined. The discipline refers to the obedience, behavior, respect
	shown by the employees towards others.
	4. Unity of Command: According to this principle, an individual in the
	organization must receive orders from only one supervisor. In case an <b>10</b>
	individual has the reporting relationship with more than one supervisor
	then there may be more conflicts with respect to whose instructions to
	be followed.
	5. Unity of Direction: Unity of direction means, all the individual or
	groups performing different kinds of a task must be directed towards the
	common objective of the organization.
	6. Subordination of Individual to General Interest: According to this
	principle, the individual and organizational interest must coincide to get
	the task accomplished. The individual must not place his personal
	interest over the common interest, in case there a conflict.
	7. Remuneration of Personnel: The payment methods should be fair
	enough such that both the employees and the employers are satisfied.
	8. Centralization: Fayol defines centralization as the means of reducing
	the importance of subordinate's role in the organization, and the extent
	to which the authority is centralized or decentralized depends on the
	organization type in which the manager is working.
	9. Scalar Chain: This means there should be a proper hierarchy in the
	organization that facilitates the proper flow of authority and
	communication. It suggests that each individual must know from whom
	he shall get instructions and to whom he is accountable to. Also, the
	communication either going up or down must pass through each level of
	authority.In certain circumstances where the quick flow of
	communication is required, the rigidity of a scalar chain can pose
	problems. Thus, Henry Fayol has suggested "gang plank" which means
	anybody in the hierarchy can interact with each other irrespective of
	their authority levels.
	10. Order: This principle is related to the systematic arrangement of things
	and people in the organization. This means every material should be in
	its place, and there should be a place for every material. Likewise, in the
	case of people, a right man should be in the right job.
	11. Equity: All the employees in the organization must be treated equally
	with respect to the justice and kindliness.
	12. Stability of Tenure: The employees should be retained in the
	organization, as new appointments may incur huge selection and

	<ul> <li>training cost.</li> <li>13. Initiative: The manager must motivitate actions to execute the plan. The initiatives as this increases the zeal are 14. Esprit de Corps: This means "unity must work together to gain synergy each other.</li> <li>Students have to write all 14 prince</li> </ul>	They must be encouraged to take ad energy among the individuals. is strength". Thus, every individual and establish cordial relations with	
6A.	Explain the Line organization with its adv		5
Ans:	Explain the Enic organization with its adv         Line Organisation:         Line organisation is the basic framework         represents a direct vertical relationship that         is the simplest and oldest, known as chain o         authority flows from top to the lower levels.         persons under him and he himself is accountate         This organisation is a vertical structure when         to his subordinate and who in turn delega         Authority flows vertically from top level per         for the execution of work. Responsibility, or         Everybody is responsible for his work and is         GENERAL MANAGER         Foreman       Asst. Finance Manager         Foreman       Accountant         Workers       Clerks         Fig: Line Organ         - In the above diagram a General I authority to Finance Manager which Finance Manager, Accountants and fi	k for the whole organisation. It rough which authority flows. This f command or scalar principle. The Every person is in charge of all the able to his superior only. The one person delegates authority thes to his subordinate and so on. Person to all the persons responsible on the other hand, flows upwards. accountable to his boss.	02
	- Advantages of Line Organisation:		

<ul> <li>Quick decision and speed of action.</li> <li>Unity of control.</li> <li>Clear division of authority and responsibility.</li> <li>Discipline and better coordination</li> <li>Direct communication.</li> </ul> 1. Simplicity. It is the simplest form of organization and very simple to understand and implement. It can be easily define and explain to all staff. 2. Responsibility is fixed. In this form of organization responsibilities are fixed and defined. Every person is crystal clear to whom he is answerable and who are accountable to him. In this type of organization shifting of responsibility is not possible because responsibility. Lower level personnal favorably react to simple the multiple authorities. 3. Unified Control. Good control, direction and direction is possible in line organization because of fixed responsibility. Lower level personnal favorably react to simple the multiple authorities. 4. Quick Decision. Single authority, unified control and fixed responsibility to help in quick decision. 5. Flexibility. In type of organization is flexible in character. This is capable of adjusting itself quickly to changing circumstances. This obviously flows from fixed responsibility because of which the executive is sole master in his own sphere of activity. Disadvantages of Line Organization Following are some demerits and disadvantages of line organization. There are several things he must manage independently. Here his level of efficiency is not the same that is why most of the time the organization activities suffer due to overloading. 2. Lack of Specialization. Different types of jobs are looked after, supervised and control by executive. It is physically not possible for him to learn and acquire the skills of the jobs he looks into and at the same time be able to do justice to each job. He cannot claim to be an expert in all types of jobs he handles. Today complex business and industrial organizations need specialization. If unfortunately it is not t

2) Differential Payment		=	
		2) Differential Payment	
Taylor introduced a new plan where low price rate in received if worker		Taylor introduced a new plan where low price rate in received if worker	

produces standard number of pieces and higher rate if he surpassed the standard. He thought in this way production can be improved.

#### 3) Drastic Re-organisation of Supervision

Taylor suggested two new concepts a) Separation of planning and doing b) Functional foremanship. In those day workers themselves used to plan, select tools and decide the order of operation in which work can be done. Taylor suggested that work has to plan by foreman not by workers. He thought that if we separate planning and work then it will be done more effectively.

### 4) Scientific Recruitment & Training

Taylor emphasized on scientific selection and development of the workers. He said that management should develop and train every worker enable him to do a higher, more interesting, more profitable class of work than he has done in the past.

## 5) Intimate Friendly Cooperation between Management & Workers

Taylor said that rather than quarreling over whatever profits that management and labor get from organization. They should cooperate and work towards common interests.

### General Approach:

- Developed standard method for performing each job.
- Selected workers with appropriate abilities for each job.
- Trained workers in standard method.
- Supported workers by planning work and eliminating interruptions.
- Provided wage incentives to workers for increased output.

#### Contributions

- Demonstrated the importance of compensation for performance.
- Initiated the careful study of tasks and jobs.
- Demonstrated the importance of personnel and their training.

#### Criticisms

- Did not appreciate social context of work and higher needs of workers.
- Did not acknowledge variance among individuals.
- Tended to regard workers as uninformed and ignored their ideas.

8.	Define Management? Explain the functional area of management.	10
Ans:	Management:	
	"Management is the direction and maintenance of an internal environment in an enterprise where individuals working in groups can perform efficiently and effectively towards the attainment of group goals" - Koontz and O'Donnel.	
	"Management is the art of knowing what you want to do and then seeing that it is done in the best and cheapest way" - F.W. Taylor .	
	"Management is the art and science of decision making and leadership" - Donald J Clough.	
	Characteristics of Management:	
	Management is a continuous process	
	<ul> <li>Management is a continuous process</li> <li>Management is an art as well as science</li> </ul>	
	<ul> <li>Management aims at achieving predetermined objectives</li> </ul>	
	<ul> <li>Management is a factor of production</li> </ul>	
	<ul> <li>Management is decision-making</li> </ul>	
	<ul> <li>Universal application</li> </ul>	
	Functional Areas of Management:	
	The major functional areas of an organization are- Operations, finanace, strategy,	
	human resource and management information system (MIS).	
	<ul> <li>Production/Operation: Related to all production related activities like</li> </ul>	
	purchasing Materials management, Research & Development etc	
	Marketing:	
	<ul> <li>- involves the distribution of organizations' products to the buyers.</li> </ul>	
	<ul> <li>-Sub activities like Advertising, Marketing research, Sales management.</li> </ul>	
	<ul> <li>Finance and accounting: deals with intelligent invest Finance and</li> </ul>	
	accounting: deals with intelligent Investment of financial resources and	
	record-keeping of various transactions .	
	<ul> <li>- sub functions are Financial Accounting, Management Accounting, Costing,</li> </ul>	
	Investment Management, Taxation	
	<ul> <li>Personnel: management of human resources sub-activities are Recruitment and Selection, Training and Development, Wage and Salary Administration, Industrial Relations</li> </ul>	
	Management Information System	
	Strategy
