15TE655

Sixth Semester B.E. Degree Examination, Aug./Sept. 2020

Image Processing

Time: 3 hrs.

Max. Marks: 80

Note: Answer any FIVE full questions, choosing ONE full question from each module.

Module-1

- a. With the help of neat block diagram explain the fundamental steps of digital image processing. (10 Marks)
- b. Explain the basic relationships between pixels :
 - i) 4 – adjacency
 - ii) 8 – adjacency
 - iii) m – adjacency. (06 Marks)

OR

- a. With the help of neat block diagram explain the components of general purpose image system processing. (08 Marks)
- b. What is a digital image? Explain about sampling and quantization of an image. (08 Marks)

Module-2

- a. A histogram has 8 levels of size 64×64 as shown in Fig.Q3(a). Draw the histogram of an equalized image.

Fig.Q3(a)

- b. Explain the following intensity transformation function with necessary graphs.
 - i) Image negative
 - ii) Log transformation
 - iii) Power law transformations (Gamma). (08 Marks)

OR

- a. Explain the basic concept of spatial filtering in image enhancement. (08 Marks)
- b. Explain image sharpening in spatial domain using 2^{nd} order Laplacian mask. (08 Marks)

Module-3

- a. Explain the following properties of 2DDFT.
 - i) Translation
 - ii) Rotation
 - iii) Periodicity
 - iv) Separability. (08 Marks)
- b. Explain homomorphic filtering in image enhancement. (08 Marks)

CMRIT LIBRARY
BANGALORE - 560 037

OR

- 6 a. Explain the following noise probability density function :
i) Gaussian ii) Erlang iii) Rayleigh iv) Exponential. (08 Marks)
b. Explain order statistic filters used in image restoration in the presence of noise. (08 Marks)

Module-4

- 7 a. Explain 3 principal ways to estimate the degradation function for use in image restoration. (10 Marks)
b. Explain inverse filtering approach and its limitation in image restoration. (06 Marks)

OR

- 8 a. Write the mask for Robert, Sobel and Prewitt operator. (06 Marks)
b. Write a note on Hit and Miss transformation Erosion and dilation. (10 Marks)

Module-5

- 9 a. Explain region based segmentation technique. (08 Marks)
b. Explain boundary tracing algorithm. (08 Marks)

OR

- 10 a. Explain how chain codes can be used for boundary representation. (06 Marks)
b. Explain minimum perimeter polygon approach for boundary representation. (06 Marks)
c. Write a note on signatures. (04 Marks)
