First Semester MBA Degree Examination, Aug./Sept. 2020 Quantitative Methods

Time: 3 hrs.

Max. Marks:80

**Note: 1. Answer any FOUR full questions from Q.No.1 to 7.
2. Q.No. 8 is compulsory.**

- 1 a. What is binomial distribution? (02 Marks)
- b. In a bolt factory machines A, B, C manufacturing respectively 25%, 35% and 40% of the total productions. Out of their total output 5%, 4% and 2% respectively are defective bolts. A bolt is drawn at random and is found to be defective. What is the probability that if is manufactured by : i) Machine A ii) Machine B. (06 Marks)
- c. The following data relate to the solves obtained by salesperson of a company in an intelligence test of their weekly sales in thousands of rupees.

Salesperson	A	B	C	D	E	F	G	H	I
Test solves	50	60	50	60	80	50	80	40	70
Weekly sales	30	60	40	50	60	30	70	50	60

Obtain the regression line of sales. If the intelligence test solve of a salesperson is 65. What is his expected sale? (08 Marks)

- 2 a. Define Dispersion? (02 Marks)
- b. A merchant's file of 20 accounts contains 6 delinquent and 14 non-delinquent accounts. An auditor randomly selects 5 of these accounts for examination.
 - i) What is the probability that the auditor finds exactly 2-delinquent account?
 - ii) Find the expected number of delinquent accounts in the sample selected. (06 Marks)
- c. What is 'Decision theory'? Explain the steps of decision making process. (08 Marks)
- 3 a. What do you mean by regression analysis? (02 Marks)
- b. Briefly explain the different types of decision making environment. (06 Marks)
- c. A survey was conducted to determine the age (years) of 120 automobiles. The results of survey is as follows :

Age of auto	0 – 4	4 – 8	8 – 12	12 – 16	16 – 20
No. of autos	13	29	48	22	8

Find the median age and modal age of autos. Also find the mean age. (08 Marks)

- 4 a. What are decision trees? (02 Marks)
- b. Calculate standard deviation and coefficient of variation from the following data : here total number of persons dying is 125

Age under/year	10	20	30	40	50	60	70	80
Number of persons dying	15	30	53	75	100	110	115	125

- c. Solve the following Linear programming problem by graphical method.

Minimize $Z = 3x_1 + 5x_2$
subject to constraints $-3x_1 + 4x_2 \leq 12$

$$2x_1 + 3x_2 \geq 12$$

$$2x_1 - x_2 \geq -2$$

and $x_1 \leq 4$; $x_2 \geq 2$; $x_1, x_2 \geq 0$.

CMRIT LIBRARY
BANGALORE - 560 037

(06 Marks)
(08 Marks)

Important Note : 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.
2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice.

- 5 a. What is a redundant constraint? (02 Marks)
 b. From the following data calculate the rank correlation coefficient after making adjustment for tied ranks.

x	48	33	40	9	16	16	65	24	16	57
y	13	13	24	6	15	4	20	9	9	19

(06 Marks)

- c. Anita electric company produces two products P₁ and P₂. Products are produced and sold on a weekly basis. The weekly production cannot exceed 25 for product P₁ and 35 for product P₂ because of limited available facilities. The company employs total of 60 workers. Product P₁ requires 2 man week of labour, while P₂ requires one man week of labour Profit margin on P₁ is Rs 60 on P₂ is Rs 40. Formulate this problem as an LPP. (08 Marks)
- 6 a. What kind of decision making situation may be analysed using PERT and CPM? (02 Marks)
 b. Use north west corner method (NWCM) and Least Cost Method (LCM) to find an initial basic feasible solution to the transportation problem.

	D ₁	D ₂	D ₃	D ₄	Supply
S ₁	19	30	50	10	7
S ₂	70	30	40	60	9
S ₃	40	8	70	20	18
Demand	5	8	7	14	34

(06 Marks)

- c. Draw a network corresponding to the following information :

Activity	1-2	1-3	2-6	3-4	3-5	4-6	5-6	5-7	6-7
Duration	4	6	8	7	4	6	5	19	10

- i) Draw a network diagram
 ii) Obtain early and late start time and completion time
 iii) Determine the critical path.

(08 Marks)

- 7 a. Illustrate merge and burst events in network analysis. (02 Marks)
 b. Calculate the median for the following distribution

Annual sales Rs (000)	Less than 10	Less than 20	Less than 30	Less than 40	Less than 50	Less than 60
Frequency	4	20	35	55	62	67

Is it possible to calculate the mean? If possible calculate it. (06 Marks)

- c. Solve the following transportation problem for maximum profit, only, by initial basic feasible solution (Use Vogel's approximation method) (08 Marks)

Per unit profit (Rs)

Market

	A	B	C	D
X	12	18	6	25
Y	8	7	10	18
Z	14	3	11	20

Warehouse

Available at warehouse		Demand in the market	
x :	200 units	A :	180 units
y :	500 units	B :	320 units
z :	300 units	C :	100 units
		D :	400 units

8 Compulsory :

a. Explain the following in brief :

- i) Multiple regression
- ii) Baye's theorem
- iii) Random variable

(08 Marks)

b. A small project is composed of 2 activities whose time estimates are listed in the table below. Activities are identified by their beginning (i) and ending (j) node numbers.

activity (i - j)	Estimated duration (weeks)		
	optimistic (t_c)	Most likely (t_m)	Pessimistic (t_p)
1 - 2	1	1	7
1 - 3	1	4	7
1 - 4	2	2	8
2 - 5	1	1	1
3 - 5	2	5	14
4 - 6	2	5	8
5 - 6	3	6	15

- i) Draw the network diagram
- ii) What is expected project length?
- iii) Calculate variance and standard deviation of the project length.

(08 Marks)
