1 (a) What is Accounting Cycle?	[03]	CO1	
(b) Explain five users of accounting information	[07]	CO2	
(c) Following are the balances extracted from the books of Mr. A. Prepare trial balance.	[10]	COI	
Particulars Amount Particular	¬		

Particulars	Amount	Particulars	Amount
Capital	40,000	Purchases	94,000
Creditors	13,000	Sales returns	3400
Drawings	4000	Purchase returns	2400
Salaries	7200	Carriage inwards	1400
Bills receivables	5800	Printing and stationery	3500
Bills payable	7000	Stock Stationery	
Debtors	16,000	Machinery	29,900
Sales	144,000	Household goods	10,000
Insurance	1200	Wages	3000
Bad debts	600		5000
Land	20,000	Rent	1600
Discount		Interest received	1700
	900	Travelling expenses	1000
Commission received	800	Electricity charges	400

2 (a) Define accounting

(b) Hari and Co. incurred the following expenses during the year 2010 classify the expenses as capital and revenue.

Rs 850, spent towards replacement of a worn out part in a machinery.

Rs 1700 spent for legal expenses in relation to raising of a loan of a business.

Rs 500 spent for ordinary repairs of plant.

Rs 7000 spent on replacing a petrol driven engine by a diesel driven engine.

Electricity charges Rs 1500 per month

(c) Show the accounting equation on the basis of following transactions Commenced business with cash Rs 90,000

Purchased goods on credit for Rs 25,000

Purchased furniture on cash for Rs 25,000

Received commission Rs 2000

Paid salaries of Rs 500

Sold goods on credit for Rs 6000

Opened an account with SBI Rs 5000

3 (a)	Discuss personal accounts its types with example Accounting is the process of recording financial transactions pertaining to a business. The accounting process includes summarizing, analyzing, and reporting these transactions to oversight agencies, regulators, and tax collection entities.	[03]	CO1	L2	
(b)	Explain Journal, ledger and trial balance with the format. a ledger is an account wise summary of all monetary transactions, whereas a trial balance is the debit and credit balance of such ledger accounts. Traditionally a ledger was prepared in a physical book with a separate page for each account and a trial balance was derived from these accounts.	[07]	CO2	L2	
(c)	Summarise any five accounting concepts and conventions	[10]	CO1	L1	
	Accounting Concepts Business entity concept: A business and its owner should be treated separately as far as their financial transactions are concerned.				
	Money measurement concept: Only business transactions that can be expressed in terms of money are recorded in accounting, though records of other types of transactions may be kept separately.				
	<u>Dual aspect concept</u> : For every credit, a corresponding debit is made. The recording of a transaction is complete only with this dual aspect.				

Going concern concept: In accounting, a business is expected to continue for a fairly long time and carry out its commitments and obligations. This assumes that the business will not be forced to stop functioning and liquidate its assets at "fire-sale" prices.

<u>Cost concept</u>: The fixed assets of a business are recorded on the basis of their original cost in the first year of accounting. Subsequently, these assets are recorded minus depreciation. No rise or fall in market price is taken into account. The concept applies only to fixed assets.

Accounting Conventions:

Accounting Conventions

There are four main conventions in practice in accounting: conservatism; consistency; full disclosure; and materiality.

<u>Conservatism</u> is the convention by which, when two values of a transaction are available, the lower-value transaction is recorded. By this convention, profit should never be overestimated, and there should always be a provision for losses.

<u>Consistency</u> prescribes the use of the same accounting principles from one period of an accounting cycle to the next, so that the same standards are applied to calculate profit and loss.

<u>Materiality</u> means that all material facts should be recorded in accounting. Accountants should record important data and leave out insignificant information.

<u>Full disclosure</u> entails the revelation of all information, both favourable and detrimental to a business enterprise, and which are of material value to creditors and debtors.
