## IAT 1-17EC752-2020

Questions Responses 110 Total points: 50

USN *	/ 0
1CR17EC076	
Add individual feedback	
✓ The equation representing the IBM IoT frame work is: 1	/ 1
Gateway+(Connect+Collect+Assemble+Manage) and Analyse = Internet of Things	
Gather+Consolidate+(Connect+Collect+Assemble+Manage) and Analyse = Internet of Things	<b>✓</b>
Physical object+Internet+Manage+tore+Analyse = Internet of Things	
Gateway+(Connect+Database+Organize+Analyse) = Internet of Things	
Add individual feedback	
✓ The ITU-T reference model proposes (i) four layers (ii) lowest layer as device layer has device and gateway capabilities (iii) next layer to the device layer has transport and network capabilities (iv)next layer is the services and application support layer and (v) and the top most layer is Application layer	/ 1
(i) is incorrect	
(ii) to (v) are layers in the model and (i) is true.	<b>✓</b>
only (i) is true	
(ii) and (v) are in correct	
Add individual feedback	

✓ The frame work developed by CISCO for a smart city is a four layer architecture	1	/ 1
<ul><li>True</li><li>False</li></ul>		<b>✓</b>
Add individual feedback		
✓ What is the full form of OpenHAB	1	/ 1
Open Hub Auto system		
Open Home Automation System		
Open Home Alert System		
none of the above		<b>✓</b>
Add individual feedback		
✓ Connectivity interface and Edge computing is part of which M2M domain?	1	/ 1
M2M application Domain		
M2M Network Domain		
M2M device Domain		<b>✓</b>
None of the above		
Add individual feedback		

✓ The major components of IoT system are (i) physical objects, (ii)hardware consisting of micro controller ,firmware sensors actuators,control unit (iii) Communication Module and (iv) software	1	/ 1
True		<b>✓</b>
False		
Add individual feedback		
✓ M2M is evolved from IoT	1	/ 1
True		
False		<b>✓</b>
Add individual feedback		
✓ In modified OSI model for IoT presentation and seeion layer is combined and known as	1	/ 1
Data Adaptation layer		
Network Layer		
Application Support layer		<b>✓</b>
Transport Layer		
Add individual feedback		

	Manage+Acquire+Organise and Analyse happens at which layer in modified OSI model for IoT	1	/ 1
0	Data Adaptation		
$\bigcirc$	Network Layer		
	Application Support layer		<b>✓</b>
$\bigcirc$	Transport Layer		
Add i	ndividual feedback		
	Stream is associated with which layer in modified OSI model for IoT	1	/ 1
·	,		
	Transport Layer		<b>✓</b>
$\bigcirc$	Application Support layer		
$\bigcirc$	Network Layer		
$\bigcirc$	Data Adaptation		
Add i	ndividual feedback		

✓ Gather and Enrich is associated with which layer in modified OSI model for lo	T 1	/ 1
Physical cum Data-link Layer and Data Adaptation layer		<b>✓</b>
Network Layer		
Application Support layer		
Transport Layer		
Add individual feedback		
✓ IETF stands for	1	/ 1
International Engineering Task Force		
Internet Engineering Task Force		<b>✓</b>
Indigenous Engineering Task Force		
Internet Engine Task Force		
Add individual feedback		

In ITU-T reference model Data Adaptation and Physical cum Data Link Lay combine and named as	/er is	1	/ 1
Device Layer			<b>✓</b>
Network Layer			
Application support layer			
Application Layer			
Add individual feedback			
Data Adaptation, conversion and change of protocol, format or code usir software is known as	ng	1	/ 1
Transcoding			<b>✓</b>
Privacy			
Integration			
fusion			
Add individual feedback			

✓ Data acquisition from the devices /devices network is known as	1	/ 1
O Data dissemination		
Data Gathering		<b>✓</b>
O Data handling		
O Data Adaptation		
Add individual feedback		
✓ Polling, Event based gathering, scheduled interval, continuous monitoring are different techniques of	1	/ 1
O Data dissemination		
O Data handling		
O Data Adaptation		
Data Gathering		<b>✓</b>
Add individual feedback		
✓ Data aggregation refers to the process of joining together present and previously received data frames after removing redundant or duplicate data	1	/ 1
True		<b>✓</b>
False		
Add individual feedback		

✓ A Device Management provisions for	1	/ 1
provide a unique device ID		
Device activating and deactivating		
O Device configuration		
all of the above		<b>✓</b>
Add individual feedback		
✓ OMA stands for	1	/ 1
OpenMobile Alliance		<b>✓</b>
OpenMobile Association		
Open M2M Alliance		
None of the above		
Add individual feedback		
✓ VPN stands for	1	/ 1
Virtual proxy network		
Virtual personal network		
Vertical personal network		
none of the above		<b>✓</b>
Add individual feedback		

Suggested privacy model depends on the following components (i) trust (ii) device and application identities management (iii) authentication (iv) Authorization and (v) reputation	1	/ 1
All except (vi) are true		
All except (ii) are true		
All except (i) are true		
all are true		<b>✓</b>
Add individual feedback		
✓ Data enrichment before the data disseminates to the network means (i)aggregation (ii)compaction (iii)fusion (iv)adjusting data rate within the permitted limit,(v)communication as per protocol standards,(vi)formatting as per protocol specifications	1	/ 1
all are true		
All except (iv) and (v) are true		<b>✓</b>
All except (iii) and (v) are true		
(i) to (iii) are true		
Add individual feedback		

✓ REST stands for	1	/ 1
Repository state transfer		
Representational State Transfer		<b>✓</b>
Rest State Transfer		
None of the above		
Add individual feedback		
★ Short form for Routing over Low power and Loss is	0	/ 1
ROLL		
O RLPL		
none		×
Correct answer		
ROLL		
Add individual feedback		

★ HTTP is a unconstrained protocol	0	/ 1
True		
False		×
Correct answer		
True		
Add individual feedback		
✓ MQTT stands for	1	/ 1
MQ Telemetry Things		
MQ Transport Telemetry		
MQ Transport Things		
MQ Telemetry Transport		<b>✓</b>
Add individual feedback		
✓ MQTT is protocol	1	/ 1
Machine to Machine		
Internet of Things		
Machine to Machine and Internet of Things		<b>✓</b>
Machine Things		
Add individual feedback		

✓ For MQTT, which statement is correct	1	/ 1
Publishers publish the data to broker		
Subscriber subscribes to broker using title		
Broker uses store and forward operation		
All of the above		<b>✓</b>
Add individual feedback		
✓ XMPP Full form is	1	/ 1
Extensible Messaging and Presence Protocol		<b>✓</b>
Extensible Module and presence protocol		
Extensible Messaging Presence Protocol		
Extensible Message and Presence Protocol		
Add individual feedback		
✓ CoAP is a specialized protocol.	1	/ 1
Web Transfer		<b>✓</b>
OPower		
Application		
Resource		
Add individual feedback		

✓ CoAP feels very much like HTTP.	1	/ 1
<ul><li>True</li><li>False</li></ul>		<b>✓</b>
Add individual feedback		
✓ Gateway provides the connection between and	1	/ 1
Cloud and controller		<b>✓</b>
Network and Cloud		
Network and Controller		
Controller and device		
Add individual feedback		
✓ What is the full form of CoAP-MQ	1	/ 1
Constrained Application Protocol Message Queuing		<b>✓</b>
Constrained Application Protocol Message Queue		
Constrained Application Protocol Multiple Queuing		
Constrained App Protocol Message Queue		
Add individual feedback		

✓ LWM2M is	1	/ 1
Less weight machine to machine protocol  Low weight machine to machine protocol		
Light weight machine to machine protocol		<b>✓</b>
O Lower weight machine to machine protocol		
Add individual feedback		
✓ CoAP works on	1	/ 1
■ UDP		<b>✓</b>
○ TCP		
Add individual feedback		
✓ Data Enrichment process involves	1	/ 1
Aggregation		
Compaction		
Fusion		
All of the above		<b>✓</b>
Add individual feedback		

✓ Which one out of these is not LPWAN technologies:	1	/ 1
SigFox		
WiFi		<b>✓</b>
NB-IoT		
○ LoRa		
Add individual feedback		
✓ What connects IoT devices to the cloud in order to aggregate data, translate between protocols and process data before sending it on?	1	/ 1
O IoT sensors		
O IoT standards		
IoT gateways		<b>✓</b>
O IoT processors		
Add individual feedback		

✓ A smart home consists of	1	/ 1
Sensor networks		
Communication network infrastructure		
Intelligent control and management		
All the above		<b>✓</b>
Add individual feedback		
✓ The hybrid cloud is the combination of	1	/ 1
Public cloud and private cloud		<b>✓</b>
Public cloud and community cloud		
Private cloud and community cloud		
None of the above		
Add individual feedback		
✓ The gateway in IOT nodes deals with	1	/ 1
Edge computing		<b>✓</b>
Cloud computing		
Server computing		
O Data Computing		
Add individual feedback		

✓ IOT conceptual framework is defined by	1	/ 1
CISCO and Oracle		<b>✓</b>
Microsoft and IBM		
CISCO and		
Amazon and Microsoft		
Add individual feedback		
✓ What is full form of JSON	1	/ 1
Java script object notation		<b>✓</b>
Java script object note		
Java score object notation		
Java script obj notation		
Add individual feedback		

★ CoAP-SMS is	0	/ 1
Constrained application protocol short messaging service		
Constrained application protocol short message service		×
Constrained app protocol short messaging service		
Constrained application protocol short messaging serve		
Correct answer		
Constrained application protocol short messaging service		
Add individual feedback		
✓ What are the message communication protocols for connected devices:	1	/ 1
CoAP-SMS		
CoAP-MQ		
MQTT		
○ XMPP		
All of the above		<b>✓</b>
Add individual feedback		

describes a cloud service that can only be accessed by a limite amount of people.	ed 1	/ 1
O Data center		
Private cloud		<b>✓</b>
Virtualization		
O Public cloud		
Add individual feedback		
describes a distribution model in which applications are hosted service provider and made available to users.	d by a 1	/ 1
Infrastructure-as-a-Service (IaaS)		
Platform-as-a-Service (PaaS)		
Software-as-a-Service (SaaS)		<b>✓</b>
Cloud service		
Add individual feedback		
Access to a Cloud environment always costs more money compared to traditional desktop environment.	a 1	/ 1
True		
False		<b>✓</b>
Add individual feedback		

✓ is the feature of cloud computing that allows the service to change in size or volume in order to meet a user's needs.	1	/ 1
Scalability		<b>✓</b>
Virtualization		
Security		
Cost-savings		
Add individual feedback		
A Cloud environment can be accessed from anywhere in the world as long as the user has access to the Internet.	1	/ 1
True		<b>✓</b>
False		
Add individual feedback
