8 Case Study (Compulsory) :

The economic survey 2021 – 22 took note of the fact that India made it to the coveted list of top 50 innovative countries for the first time in 2020, ranking 48th among 131 countries in the Global Innovation Index (GII). According to GII, “India along with 3 other economics Vietnam, republic of Maldives and Kenya has the rare distinction of being an innovative achiever for ten consecutive years”, the survey said the Index also pointed out that the country appears to be underperforming in innovation with respect to the size of its GDP. The survey called it as a warning against complacency. “The business sector’s Gross Expenditure on Research and Development (GERD) in USA, China, Japan and Germany is much higher as expected for their level of development. Higher education sector in Canada and Germany also has a larger GERD than their level of development”, the survey read. Similarly, while the governments contribution is 56% to the GERD, this proportion is less than 20% than the top ten economies.

- a. What are the areas the Govt. of India should focus on for a higher growth trajectory? (05 Marks)
- b. Emphasize the role of private sector in boosting innovation culture in India. (05 Marks)
- c. What India should do now to effectively translate investments in innovation inputs to produce a higher level of innovation outputs? (10 Marks)
