8

CASE STUDY (Compulsory)

The company was a large Dutch FMCG retailer that used people analytics to analyze the effects of training. The analyst found that training shop personnel had a positive impact on the shop's financial performance. This was measured through training and development metrics. In the first year alone, the ROI of their training program was 400%.

Questions:

- a. Identify the various training and development metrics that need to be analysed to measure the success of training program. (10 Marks)
- b. Discuss the role of HR analytics in determining the performance of an organization. (10 Marks)
