## Second Semester MBA Degree Examination, June/July 2024 Operations Research

Max. Marks: 100

- Note:**
1. Answer any **FOUR** full questions from Q.No.1 to Q.No.7.
  2. Question No. 8 is compulsory.
  3. Tables allowed.
  4. M : Marks , L: Bloom's level , C: Course outcomes.

		M	L	C																																								
Q.1	a.	3	L2	CO1																																								
	b.	7	L3	CO2																																								
Q.1	c.	10	L4	CO3																																								
	A mutual fund company has Rs.20 lakhs available for investment in government bonds, blue chip stocks, speculative-stocks and short-term deposits. The annual expected return and risk factors are given below :																																											
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 30%;">Type of Investment</th> <th style="width: 30%;">Annual expected return in percentage (%)</th> <th style="width: 30%;">Risk factor (0 to 100)</th> </tr> </thead> <tbody> <tr> <td>Govt. Bonds</td> <td style="text-align: center;">14</td> <td style="text-align: center;">12</td> </tr> <tr> <td>Blue chip stocks</td> <td style="text-align: center;">19</td> <td style="text-align: center;">24</td> </tr> <tr> <td>Speculative stocks</td> <td style="text-align: center;">23</td> <td style="text-align: center;">48</td> </tr> <tr> <td>Short term deposits</td> <td style="text-align: center;">12</td> <td style="text-align: center;">6</td> </tr> </tbody> </table>				Type of Investment	Annual expected return in percentage (%)	Risk factor (0 to 100)	Govt. Bonds	14	12	Blue chip stocks	19	24	Speculative stocks	23	48	Short term deposits	12	6																									
	Type of Investment	Annual expected return in percentage (%)	Risk factor (0 to 100)																																									
	Govt. Bonds	14	12																																									
	Blue chip stocks	19	24																																									
Speculative stocks	23	48																																										
Short term deposits	12	6																																										
Mutual fund is required to keep at least Rs.2 lakhs in short-term deposits. The average risk factors should not exceed more than 42. Speculative stocks must be at most 20 percent of the total amount invested. How should mutual fund invest the funds so as to maximize its total expected annual return? Formulate a Linear Programming problem.																																												
Q.2	a.	3	L2	CO1																																								
	b.	7	L3	CO2																																								
Q.2	c.	10	L4	CO3																																								
	Use graphical method to solve the following L.P. problem, Minimize $z = 20x_1 + 10x_2$ Subject to constraints $x_1 + 2x_2 \leq 40$ $3x_1 + x_2 \geq 30$ $4x_1 + 3x_2 \geq 60$ where $x_1, x_2 \geq 0$																																											
Q.3	a.	3	L2	CO1																																								
	b.	7	L4	CO2																																								
		<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th rowspan="2" style="width: 15%;">Origin</th> <th colspan="4" style="width: 40%;">Destination</th> <th rowspan="2" style="width: 10%;">Supply</th> </tr> <tr> <th style="width: 10%;">I</th> <th style="width: 10%;">II</th> <th style="width: 10%;">III</th> <th style="width: 10%;">IV</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">A</td> <td style="text-align: center;">4</td> <td style="text-align: center;">6</td> <td style="text-align: center;">8</td> <td style="text-align: center;">13</td> <td style="text-align: center;">50</td> </tr> <tr> <td style="text-align: center;">B</td> <td style="text-align: center;">13</td> <td style="text-align: center;">11</td> <td style="text-align: center;">10</td> <td style="text-align: center;">8</td> <td style="text-align: center;">70</td> </tr> <tr> <td style="text-align: center;">C</td> <td style="text-align: center;">14</td> <td style="text-align: center;">4</td> <td style="text-align: center;">10</td> <td style="text-align: center;">13</td> <td style="text-align: center;">30</td> </tr> <tr> <td style="text-align: center;">D</td> <td style="text-align: center;">9</td> <td style="text-align: center;">11</td> <td style="text-align: center;">13</td> <td style="text-align: center;">8</td> <td style="text-align: center;">50</td> </tr> <tr> <td style="text-align: center;">Demand</td> <td style="text-align: center;">25</td> <td style="text-align: center;">35</td> <td style="text-align: center;">105</td> <td style="text-align: center;">20</td> <td></td> </tr> </tbody> </table>			Origin	Destination				Supply	I	II	III	IV	A	4	6	8	13	50	B	13	11	10	8	70	C	14	4	10	13	30	D	9	11	13	8	50	Demand	25	35	105	20
