Performance Analysis of channel estimation techniques for MIMO OFDM systems

PhD Thesis Submitted in Partial Fulfillment for the Award of Degree of

Doctor of Philosophy
in
Faculty of Electrical and Electronics Engineering Sciences

(Electronics and Communication Engineering)

By

Pappa M

(USN: 1CR12PEN02)

Under the Supervision and Guidance of

Dr. Ramesh C

Professor, Department of Electronics and Communication Engineering

Research Center
Department of Electronics and Communication Engineering

CMR INSTITUTE OF TECHNOLOGY

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

CMR Institute of Technology, Bengaluru-560 037

CERTIFICATE

This is to certify that**Pappa M**with **USN: 1CR12PEN02,** Research Scholar Department of Electronics and Communication Engineering, CMR Institute of Technology, Bengaluru, registered for Ph.D. under the guidance of**Dr.Ramesh C**has successfully completed the research work entitled **"Performance analysis of channel estimation techniques for MIMO OFDM systems"** and is submitting her thesis in partial fulfillment of the requirements for the award of degree of "**DOCTOR OF PHILOSOPHY**" in Electrical Engineering Sciences, by **VISVESVARAYATECHNOLOGICAL UNIVERSITY**, Belagavi.

DECLARATION

I hereby declare that the entire work embodied in this Doctoral Thesis entitled, **"Performance analysis of channel estimation techniques for MIMO OFDM systems"** submitted to Visvesvaraya Technological University, Belagaviis carried out by me at Research Centre, Department of Electronics and Communication Engineering, CMR Institute of Technology, Bengaluru, under the guidance ofDr.Ramesh C, Professor, Department of Electronics and Communication Engineering, CMR Institute of Technology, Bengaluru. This thesis has not been submitted in part or full for the award of any Degree or Diploma of this or any other University.

Date : 16.12.2022

Place : Bengaluru

M. Pappa

(Pappa M)
Research Scholar

ACKNOWLEDGEMENT

I make a move to pass my appreciation on to for their help, care and assistance during my doctoral studies, which has led to the successful completion of thesis.

First of all, I might want to say thanks to God Almighty for giving me the opportunity as well as guidance to complete this thesis successfully.

I might want to offer my true thanks to my guide Professor Dr.Ramesh C, for the nonstop help of my Ph.D review and related research, for his sympathetic, encouragement, and incredible information. His path helped me in all the hour of study and composing of this thesis.

I am thankful to the **Management of CMR Institute of Technology**, for giving the conveniences to do the research. I'm exceptionally obliged to communicate my profound feeling of gratitude to **Dr.Sanjay Jain, Principal**, and **Dr.B.NarasimhaMurthy, Vice Principal, CMR Institute of Technology**, for their support and necessary resources to complete this research. My heartfelt thanks to **Dr.Elumalai R**, **HOD/ECE Department**, for his valuable suggestions and continuous motivation.

My sincere thanks to my fellow colleagues of ECE Department, CMR Institute of Technology for their support and encouragement throughout my research.

I dedicate this research work to my husband **Late. C.Palaniappan,** who has been a constant source of support and encouragement during my challenges of research. I appreciate my son **Kishore Palaniappan**, for his patience and unconditional love displayed during my postulation composing. Words could never say that I am so thankful to both of you.

My genuine respects to my folks, sisters, my better half's loved ones for their adoration and moral help.

PAPPA M

1.1	OFDM transmitter system	6
1.2	OFDM receiver system	6
1.3	OFDM signal with cyclic prefix	7
1.4	Multi-path spread	8
1.5	Illustration of the Doppler fading effect	9
1.6	SISO simulation under Rayleigh and Doppler fading channel, f_d is Doppler shift factor	10
1.7	MIMO structure	12
1.8	MIMO OFDM structure	13
1.9	Spectral efficiency Versus Energy efficiency for multiple access systems	15
1.10	Sum-rate capacity with Dirty Paper Coding in the downlink for multiple users In intervening scenarios	15
1.11	Time slot for FDD as well as TDD systems with channel estimation	17
1.12	Pilot contamination example when both users transmit mutually non-orthogonal training sequences	18
1.13	Typical Block Diagram for Telecommunication System	19
1.14	NOMA-MIMO system model	22
2.1	Basic wireless communication system	26
3.1	Massive MIMO scenario	33
3.2	Implementation methodology	34
3.3	Plot of Bit Error Rate Versus Signal to Noise ratio for blind channel in massive MIMO environment	38
3.4	Performance Analysis of conventional MIMO with blind channel	39
3.5	Performance Analysis of massive MIMO with the effect of Training-based channel	39
3.6	Performance Analysis of conventional MIMO with the effect of Training based channel (2 x2)	39
3.7	Comparative analysis of conventional and massive MIMO	40
3.8	BER Comparison graph (LS and CS MMSE)	44
3.9	BER Comparison graph (Conventional MMSE and CS MMSE)	45

3.10 BER Comparison graph (Conventional LS, MMSE and CS MMSE) 45
4.1 SIC Receiver 49
4.2 AWGN Channel Simulink Design Model 49
4.3 Rayleigh Channel Simulink Design Model 50
4.4 Error Correcting Code Design Model 50
4.5 Combining Two User in NOMA using Power Allocation 51
4.6 8-PSK Constellation 52
4.7 Modulation Error Rate and Error Vector Magnitude quantities for 8-PSK Modulator 52
4.8 BER vs SNR for Downlink of AWGN fading Channel 53
4.9 BER vs SNR for Uplink of AWGN fading Channel 54
4.10 Performance of Rayleigh fading Channel in the downlink 54
4.11 Performance of Rayleigh fading Channel in the uplink 55
4.12 Simulation Output for Encoder 55
4.13 Error Correcting Decoder Simulation 56
4.14 Multiple Access Technologies 58
4.15 NOMA Technology 59
4.16 Averaging in Iterative Algorithm 60
4.17 MIMO Principle 61
4.18 Illustration of (a) NOMA (b) OMA for two user scenario 62
4.19 Method of Channel parameters prediction with and without NOMA 62
4.20 Flow Chart to calculate different SNR to different users 63
4.21 Average sum rate versus SNR 68
4.22 Plot of Logarithmic variation of Average sum rate VS SNR 69
4.23 BER performance analysis for 2x2 and 4x4 of MIMO-NOMA-OFDM Combinations 73
4.24 LMMSE reduction with iterations for 64 QAM modulation techniques 74
4.25 SNR level with various antennas representing channel capacity Enhancement 74
4.26 NOMA with MIMO vs OFDM performance metric analysis 75

List of Tables

3.1 Performance of BER VS SNR for the two modulation schemes in training-based estimates of channel 36

3.2 Performance of BER Versus SNR for the two modulation schemes in blind parameter estimates of the channel 38

3.3 BER comparison values for conventional LS, MMSE and CS MMSE 46

4.1 Average sum Rate versus SNR with and without NOMA 67

4.2 Logarithmic values of Average sum Rate versus SNR with and without NOMA 68

4.3 Comparison of proposed NOMA-MIMO system and OFDM system in term of SNR and BER under different K values and different levels of QAM modulation 76
