BPLCK105B

## First Semester B.E/B.Tech. Degree Examination, Dec.2024/Jan.2025 Introduction to Python Programming

Time: 3 hrs.

Max. Marks:100

Note: 1. Answer any FIVE full questions, choosing ONE full question from each module.
2. M: Marks, L: Bloom's level, C: Course outcomes.

|     |    | Module – 1  | M | L  | C   |
|-----|----|---|---|----|-----|
| 1   | a. | Explain basic data types like int, float, double and string with an example.  | 6 | L2 | CO  |
|     | b. | Differentiate between local scope and global scope.   | 6 | L2 | CO  |
|     | c. | Develop a program to calculate factorial of a number. Program to compute binomial coefficient (Given N and R).                | 8 | L3 | CO  |
|     |    | OR OR   |   |    |     |
| 2   | a. | Define functions. Explain how to pass parameters through the function with return statement.                                  | 6 | L2 | CO  |
|     | b. | What is exception? How exception are handled in python? Write a program to solve divide by zero exception.                    | 6 | L2 | CO  |
|     | c. | Develop a program to generate Fibonacci sequence of length (N). Read N from the console.                                      | 8 | L3 | СО  |
|     |    | Module – 2  |   |    |     |
| 3   | a. | Explain Augmented short hand assignment operators with an example.  | 7 | L2 | CO  |
|     | b. | Explain different type of methods like append(), Remove(), sort(), pop() in python programming list.                          | 7 | L2 | CO  |
|     | c. | Develop a program to find mean, variance and standard deviation.  | 6 | L3 | CO. |
|     |    | OR  |   | -  |     |
| 4   | a. | Explain set() and setdefault() method in dictionary.  | 7 | L2 | CO  |
|     | b. | Develop a python to print area of rectangle.  | 6 | L3 | CO  |
| M A | c. | Define pretty printing. How does pretty print work in python with an example.   | 7 | L2 | CO  |
|     |    | Module – 3  |   |    |     |
| 5   | a. | Explain useful string functions like:  i) Capitalize  ii) Count  iii) Find  iv) Lower  v) Upper  vi) Replace with an example. | 8 | L2 | COS |
|     | b. | Develop a python code to determine whether given string is a palindrome or not a palindrome.                                  | 6 | L3 | CO  |
|     | c. | Explain: i) isalpha ii) isalnum iii) isspace().   | 6 | L2 | CO  |
|     |    | 1 of 2  |   |    |     |

|    |    |  | BPLCK105B |    |                 |
|----|----|--|-----------|----|-----------------|
|    |    | OR OR  |           |    |                 |
| 6  | a. | Explain OS path module with an example.  | 6         | L3 | CO <sub>2</sub> |
|    | b. | Explain the concept of file path. Also discuss absolute and relative file path.  | 8         | L3 | CO <sub>3</sub> |
|    | c. | Program to print of multi clipboard with appropriate message.  | 6         | L3 | CO <sub>3</sub> |
|    |    | Module – 4   |           |    |                 |
| 7  | a. | Develop a program to backing up a given folder (folder in a current working directory) into a zip file by using relevant modules and suitable methods.   | 6         | L3 | CO4             |
|    | b. | List out the difference between shutil.copy() and shutil.copythree() method.   | 6         | L1 | CO <sub>4</sub> |
|    | c. | Explain the following file operations in pythons with suitable example:  i) Copying files and folders  | 8         | L2 | CO4             |
|    |    | ii) Moving files and folders iii) Permanently deleting files and folders.  |           |    |                 |
|    |    | OR   |           |    |                 |
| 8  | a. | Briefly explain assertion and raising a exception.   | 8         | L2 | CO4             |
|    | b. | List out the benefits of using logging module with an example.   | 6         | L1 | CO4             |
|    | c. | Write a function named DivExp which takes two parameters a, b and returns a value $C(c=a/b)$ . Write suitable assertion for a 70 in function DivExp and raise an exception for when $b=0$ . Develop a suitable program which reads two values from the console and calls a function DivExp.                              | 6         | L3 | CO4             |
|    |    | Module – 5   |           |    |                 |
| 9  | a. | Define a function which takes two objects representing complex numbers and returns a new complex number with a addition of two complex numbers. Define a suitable class 'complex' to represent the complex number. Develop a program to read $N(N >= 2)$ complex numbers and compute the addition of 10 complex numbers. | 8         | L3 | CO5             |
|    | b. | Explain the concept of inheritance with an example.  | 6         | L2 | CO5             |
|    | c. | Explain the _str _ and the _init_ method with an example.  CMRIT LIBRARY   | 6         | L2 | CO5             |
|    |    | OR BANGALORE - 560 037   |           |    |                 |
| 10 | a. | Define a class and object, construct the class called rectangle and initialize it with height = 100, width = 200, starting point as $(x = 0, y = 0)$ . Write a   | 8         | L3 | CO5             |
|    |    | program to display the centre pint co-ordinates of a rectangle.  |           |    |                 |
|    | b. | Briefly explain the printing of objects with an example.   | 6         | L2 | CO5             |
|    | c. | Differentiate operator over loading and operator overriding in python.   | 6         | L2 | CO5             |

2 of 2
