2.2	8.	What is meant by under an	d over absorpt	ion of overhead?		03	L1	C
	b.	The budgeted overheads	and cost drive	er volumes of Moon I	td. are as	07	L4	C
		follows:	C)Y					
		Cost pool	Budgeted	Cost Driver	Budgeted	1		
			verhead (Rs.)		Volume			
		Material procurement	5,80,000	No. of orders	1100			
		Material Handling	2,50,000	No. of Movements	680			
		Set-up	4,15,000	No. of set-ups	520			
		Maintenance	9,70,000	Maintenance hours	8400			
		Quality control	1,76,000	No. of inspections	900			
		Machinery V	7,20,000	No. of machine hours	24000			<u> </u>
		4	1 0	f 3				

	The company has produced a batch of 2600 components of 'MAT-365', its r Rs.1,30,000 and labour cost was Rs.2,45,000. The usage activities of the s follows:						
		Material orders = 26 Material movements = 18					
		and the second se					
		Required:	of	work	ade t		
		(i) Calculate cost driver rates that are used for tracing appropriate amount	010	verne	aus u		
		the said batch.					
	-	(ii) Ascertain the cost of batch of components using ABC.	10	L4	CO		
	c.	In a factory, there are three production departments A, B and C and two	10	L4			
		service departments X and Y. The departmental expenses for the month of					
		January 2024 were given below:					
		Production Depts Service Depts					
		A – Rs.1,65,000 X – Rs.12,000					
		B – Rs.3,60,000 / Y – Rs.10,000		×			
		C – Rs.2,50,000					
		The service department expenses are allocated on a percentage basis as					
		follows:					
		Depts A B C X Y		· · ·			
		X 30% 20% 30% - 20%					
		Y 40% 30% 20% 10% -					
		Prepare a statement showing the distribution of service department		si.			
		expenses to production departments under repeated distribution method.					
Q.3	a.	From the following data calculate breakeven point:	03	L4	CO		
		Selling price = Rs.200 per unit					
		Variable cost = Rs.125 per unit					
		Fixed cost = Rs.900000		10.5			
	b.	The sales turnover and profit during years 2022 and 2023 are given below:	07	L4	CO		
		Year Sales (Rs.) Profit (Rs.)					
		2022 3,20,000 40,000			1.112-

## 22MBAFM303

22MBAFM303							
Q.5	a.	What is cost audit?	03	L1	CO3		
	b.	What is management reporting? Explain the requisites of a good report.	07	L2	CO3		
	c.	Write a detailed note on the following:(i) Cost reduction(ii) Cost control	10	L3	CO3		
		(iii) Target costing (iv) Balanced score card					
Q.6	a.	What is Revenue Centre?	03	L1	CO3		
	b.	Write a note on cost management in Agriculture Sector.	07	L3	CO3		
	c.	What is transfer pricing? Explain the methods of transfer pricing.	10	L6	CO4		
Q.7	a.	From the following information, calculate profit by using marginal costing technique: Fixed cost = Rs.2,00,000 Selling price = Rs.18 per unit Output level = 1,00,000 units	03	L4	CO3		
	b.	<ul> <li>The following information is provided with respect to A2Z Ltd for the six months of 2023 (and the sales of January 2024), in respect of product 'XY'.</li> <li>(i) The units to be sold in different months are: July 2023 = 1100, August 2023 = 1100, September 2023 = 1700, October 2023 = 1900, November 2023 = 2500, December 2023 = 2300 and January 2024 = 2000</li> <li>(ii) There will be no work in progress at the end of any month.</li> <li>(iii) Finished units equal to half the sales of the next month will be in stock</li> </ul>	07	L3	CO4		
		at the end of every month (including June 2023).					
	c.	You are required to prepare production budget for the six months of 2023. From the following data calculate machine hour rate:	10	L4	CO		
		Cost of machine = Rs.30,500, Scrap value = Rs.2500, Estimated life of machine = 12 years, Working days per year 200 days of 8 hours, 100 days of 6 hours, Repairs and maintenance 7.5% of the cost of machine, Stores issued = Rs.1000, Power consumption Rs.2 per operative hour, Insurance premium 1% of cost of machine, Supervision (per year) = Rs.7500, Idle time estimate 10%.					
Q.8	e e e e e e e e e e e e e e e e e e e	Case Study:       Atom Co. can produce 4000 units of a product at 100% capacity. The following information is available from its records:         Image:	20	L3

## First Semester MBA Degree Examination, Dec. 2024/Jan.2025 **Strategic Cost Management**

Time: 3 hrs.

Max. Marks: 100

Notes: 1. Answer any Four full questions from Q.No.1 to Q.No.7

2. Question No.8 is compulsory

3. M: Marks, L: Bloom's Level, C: Course Outcome

### **ANSWER KEY**

			AND WER RET			
				Μ	L	С
Q.1	a.	Strategic cost n	03	L1	CO1	
·		position by care	fully controlling costs according to the company's broader objectives.			
	b.	Job Costing: Jo	bb costing is a type of accounting where the cost of each job is taken into	07	L2	CO1
		account and cal				
			ing: Contract costing is a form of particular order costing that contractors			
			for orders of a long duration.			
			ing: Cost-plus costing is implemented when, in a contract, the contractor			
		receives both th	e predetermined contract price and an additional mutually agreed-upon			
		amount.				
			Batch costing is the practice of grouping orders or tasks into distinct			
		batches, considering the efficient production of items as a primary factor.				
		Process Costing: Process costing is applicable when a product undergoes various				
		· ·	es, each of which is clearly defined, distinguishable, and easily separable			
		from the others				
	c.	Solution:		10	L4	CO2
		Prime Cost: 1,2				
		Factor Cost: 1,4				
		Cost of Product				
		Cost of Sales: 1				
0.2	0	Profit: 35,300	03	L1	CO2	
Q.2	a.		er absorbed when the amount allocated to a product or other cost object is actual amount of overhead, while the amount is under absorbed when the	05	LI	02
			ed is lower than the actual amount of overhead.			
	b.	Solution:	a is lower than the actual amount of overhead.	07	L4	CO4
	υ.	(i) Cost Driver	07	L4	04	
		Material procurement = Rs. 527.27 per order Material handling = Rs. 367.65 per movement				
		Set-up = Rs. 798.08 per set-up				
		Maintenance = Rs. 115.48 per hour				
		Quality control = Rs. 195.56 per inspection				
			s. 30.00 per machine hour			
		(ii) Total Cost of the Batch = Rs. $5,54,435.60$				
	с.	Solution:	10	L4	CO4	
		Department	Total (Rs.)			
		A	1,65,000 + 3,600 + 4,160 + 192 + 51.2 + 1.92			
			+0.512 = Rs.1,74,005.63			
		В	3,60,000 + 2,400 + 3,120 + 128 + 38.4 + 1.28			
			+0.384 = Rs.3,66,688.06			
		С	2,50,000 + 3,600 + 2,080 + 192 + 25.6 + 1.92			
			+0.256 = Rs.2,61,899.78			
Q.3	a.	Solution:		3	L4	CO4
	Contribution=SP-VC=200-125=Rs.75					
		BEP = 9,00,000	0/75 = 12,000 units.			

	h	Solution:	07	L4	CO4			
	b.	P/V Ratio = $10,000/40,000*100 = 25\%$	07	L4	C04			
		(i) $P/V$ Ratio = 25%						
-	_	(ii) Sales required to earn Rs. 1,20,000 profit = Rs. 6,40,000	10	та	004			
	c.	Solution:	10	L4	CO4			
		Total Relevant Make Cost = Rs. $11,750 + 94,000 + 47,000 + 23,550 = Rs. 176,300$						
		Per unit Make Cost = Rs. 176,300 / 5,000 = Rs. 35.26						
		Option Total Cost Per Unit Cost						
		Make Rs. 176,300 Rs. 35.26						
		Buy Rs. 205,000 <b>Rs. 41.00</b>						
		Making the part is cheaper by Rs. 28,700, so the company should continue manufacturing						
		the spare part.						
Q.4	a.	Variance analysis is the accounting process that compares planned or projected performance	03	L1	CO2			
<b>X</b>	ч.	in the business to actual results. It is a quantitative tool that is intended to identify deviations	00		002			
		and their underlying causes.						
-	1.	Solution:						
	b.							
		$MCV=(4\times20)-(4.50\times24)=80-108=28$ (Adverse)						
		$MPV=(4-4.50)\times 24=-0.50\times 24=12 \text{ (Adverse)}$						
-		$MUV=(20-24)\times 4=-4\times 4=16$ (Adverse)						
	c.	Budgetary control is a financial management technique that involves establishing budgets,	10	L2	CO3			
		comparing actual results with budgeted figures, and taking corrective actions to ensure that						
		financial activities align with planned objectives.						
		Types of Budget: Master Budget, Cash Budget, Production Budget, Flexible Budget,						
		Material Purchase Budget, etc						
Q.5	a.	A cost audit evaluates a company's cost structure and financial practices to ensure	03	L1	CO3			
-		efficiency and regulatory compliance.						
	b.	Management reporting is a process of creating internal reports that help managers and	07	L2	CO3			
		executives track performance, understand business activities, and make informed decisions.						
		A good report is accurate, concise, and clear, with a suitable title and attractive presentation						
-	с.	<b>Cost reduction:</b> Cost reduction is a proactive and strategic process of minimizing	10	L3	CO3			
	с.	unnecessary expenses to improve profitability and operational efficiency	10	L3	005			
		<b>Cost control:</b> Cost control is a systematic process of monitoring, managing, and regulating						
		expenses within an organization to maintain financial stability and achieve profitability						
		Target costing: Target costing is a cost management approach where a company determines						
		the maximum allowable cost for a product, based on its expected selling price and desired						
		profit margin						
		Business score card: A "business scorecard" typically refers to a Balanced Scorecard (BSC),						
		a strategic management tool used to measure and improve an organization's performance						
Q.6	a.	A revenue center in business is a division or department within an organization that generates	03	L1	CO3			
		revenue, either from selling products or providing services.						
	b.	Reducing input costs	07	L3	CO3			
		Managing labor efficiently						
		Controlling water and energy usage and						
		Implementing effective risk management and						
		Marketing practices						
F	с.							
		transactions between associated enterprises.						
		Methods: Cost Plus Method, Comparable Uncontrolled Price Method, Profit Split Method,						
		Resale Price Method, etc.						
	0	Solution:						
		Profit=Total Contribution-Fixed Cost=3,00,000-2,00,000=Rs.1,00,000						
Q.7	a.			1				
Q.7								
Q.7	a. b.	Solution:						
Q.7		Solution: Production (units)=Sales for the month+Closing Stock of Finished Goods-Opening Stock						
Q.7		Solution: Production (units)=Sales for the month+Closing Stock of Finished Goods-Opening Stock of Finished Goods						
Q.7		Solution:         Production (units)=Sales for the month+Closing Stock of Finished Goods         of Finished Goods         Month       July       August       September       October       November       December						
Q.7		Solution: Production (units)=Sales for the month+Closing Stock of Finished Goods-Opening Stock of Finished Goods						

		hine Hour Rate = Total Annu	Effective (productive) hours=2200-220= nal Cost/Effective hours = 18385.83/1980 =			
		Comput	lsory Questing			
Q.8	Solution: (i) Flexible Budget				L3	CO4
	Capacity 60% 80% 100% (ii) Overhead A	Total Cost           9,890           11,925           13,960	ty = Rs. 2.33 per unit
